1. Long experience enables me to order from manufacturers lenses of every description used, and to have them always on hand. Consequently customers, with the exception of extreme cases, suffer no delays.

2. At our office you will find all the applicances known to modern science for the detection of imperfect vision. Have recently received from Germany a wonderfully constructed instrument called the Optimeter, a great improvement in optical instruments for the detection of the powers of secommodation of each eye.

3. A careful examination is made with in truments that point out all the defects to b

struments that point out all the defects to be corrected.

2. Having the proper lenses (or glasses) and fully understand their respective missions we are able to insert them in bows, or frames, of say material desired by the customer, setting the lenses (or glasses) at the proper angle. Also in bows of proper width, adjusting the lenses in front of the eyes so that the cone of the lense is directly in harmony with the lense of the eye.

5. By having lenses (or glasses) made of Brazillian pebble, ground polished, and so constructed in shape throughout. affording such perfect case and comfort to the wearer instead of a continual loss of sight, vision actually improves by their use. Come and see for yourselves. Talk with those that have given them a trial. Hear what they have to say. You will be convinced to have your eyes properly fitted with a pair of my improved lenses. Will not only save your money but save your vision, the value of which cannot be computed in paltry dollars. Always at my office. One of the best natured men you ever saw. No trouble to show goods or answer questions, if you will take your turn as they do in going to mil! If your case is a desperate one, if your eyes have been medically treated or surgically operated on, after which almost invariably speciacles are required. It is of great importance to you to have the proper speciales, those possessing all the merits aboved described.

If you are skeptical bring your oculist or surgeon with you. It is a plefure to do hustness with those that understand business. I always sell my improved i ness to the medical fraternity. So I say to the rest of creation, procure spectacles where those do that understand the merits or demerits of the same.
